

Expansion of Awareness at the Wesak Moon

“No cost is too great to pay order to be of use to the Hierarchy at the time of the Full Moon of May, the Wesak Festival; no price is too high in order to gain spiritual illumination which can be possible, particularly at this time.” The Tibetan DK

At this time the Great Ones are forming a great field of energy in the Himalayas through Their meditation, contemplation, mystical and spiritual rituals, and through Their great invocations and Love sent from Above to Earth.

This field which is charged with the presence of Christ and blessings of Buddah and all spiritual guides and Masters provides a Chalice for Cosmic energy and a channel through which these energies can pass to all kingdoms of nature to man.

When all people work in their own ways to express these energies, with pure motives, through opening oneself to this great field of pure Love, beauty, peace, truth and goodness, they create another energy field that infuses and floods the atmosphere with new inspiration and great healing energy and a clear and creative expression opening the hearts of ALL.

Potent energies are being released and poured onto the planet at this most potent time of the Wesak Full Moon. They come from the star Sirius, home of the Shining Ones, The Great Bear, constellation of Taurus, and the great star Aldebaran, which shines as the Eye of the Bull. These great constellations and stars are channels of energy that feed us spiritually.

At this time of the Wesak Full Moon we have a great opportunity to clean our etheric, emotional and mental bodies and to clean dark and blind urges within our etheric body of negative emotions and suppressions from our astral body, illusions and muddy thinking from our minds and to stand in the light of our spiritual awareness.

At this time of the Full Moon of Taurus, a window opens through which we can reach a high level of realization because of a great revelation which dawns in our awareness. Achieving this alignment and integration for a moment, Infinity opens and speaks to us. Sensing for one moment, that she IS, that the cosmos IS, that we are a part of and one with the Cosmos. Then all despair and feeling of separateness, which are the causes of misery disappear.

Through mental consciousness through the help of the inner guide.
Through daily meditation and discipline of life, purification of the heart, mind, body and emotions to be in service to humanity for enlightenment and liberation of all sentient beings. This is what is required to attain Freedom from pain.

Wesak is the building of the Golden bridge the cosmic beams between the physical and divine planes. The ceremony is a great labor of Love which works to build a communication line between matter and spirit, God-dess and wo-man. What is important is to hold this continuity of spiritual consciousness with you every moment and make it the reality it IS.

This energy accumulates first in the Chalice of God-dess, then into the Chalice of the souls of pure heart and radiates out to humanity. This energy can be attracted and used by all those who love their fellow human beings and who are filled with compassion toward life as a whole. When touched by this energy we become filled with goodwill and live a life of right human relations.

The three potent influences of Wesak are: Freedom, Enlightenment and the energy of the will of God-dess revealed as the Great Purpose and Plan.
